

VEST™

The best way to finish with strong yields is to *in-Vest* in a strong consistent stand. Vest is a powder nutritional hopper box seed treatment applied at planting that can help you achieve the best start to a strong finish. Vest coats the seed to deliver essential micronutrients that help the seedlings come out of the ground faster with more vigor limiting the plant's exposure to environmental stresses and disease.

BENEFITS

- Delivers targeted application of essential micronutrients
- Promotes quicker emergence and increased early season vigor
- Stronger plants limit susceptibility to disease and environmental stresses
- Convenience of application at the time of planting
- Premixed with Talc – Seed Lubricant

USE RATES

- Corn: 2 oz/A
- Cotton: 2 oz/A
- Milo: 2 oz/A
- Rice: 4 oz/A
- Soybeans: 2 oz/A
- Wheat: 4 oz/A

*For a full list of crops and rates please refer to the label

GUARANTEED ANALYSIS

- **Manganese (Mn) 2%**
 - Activates enzymes that promote protein synthesis
- **Zinc (Zn) 2%**
 - Fuels enzyme systems that generate proteins
- **Sulfur (S) 2%**
 - Element found in Amino-Acids that are building blocks of plant proteins
