

VEXER™ INSECTICIDE

Vexer offers growers effective control of hard to kill lepidopteran species (worms and moths) in corn, cotton, and soybeans. Vexer is an insect growth regulator that disrupts insect growth and development, and accelerates the molting process leading to larva mortality in lepidopteran insects. This unique mode of action is a great option for a resistance management strategy and to provide residual control of hard to kill worms.

BENEFITS

- Specifically targets and effectively controls many species of lepidopterous insects
- Beneficial Friendly - minimal impact on beneficial insects and insect pollinators
- Excellent residual control
- Great rotational option for resistance management
- Enhanced insect control when mixed with Avenger™ Bold S3™¹, Reveal EndurX®¹, or Ravage®¹

KEY INSECTS

CONTROLLED

(Please read label for a full list of controlled insects)

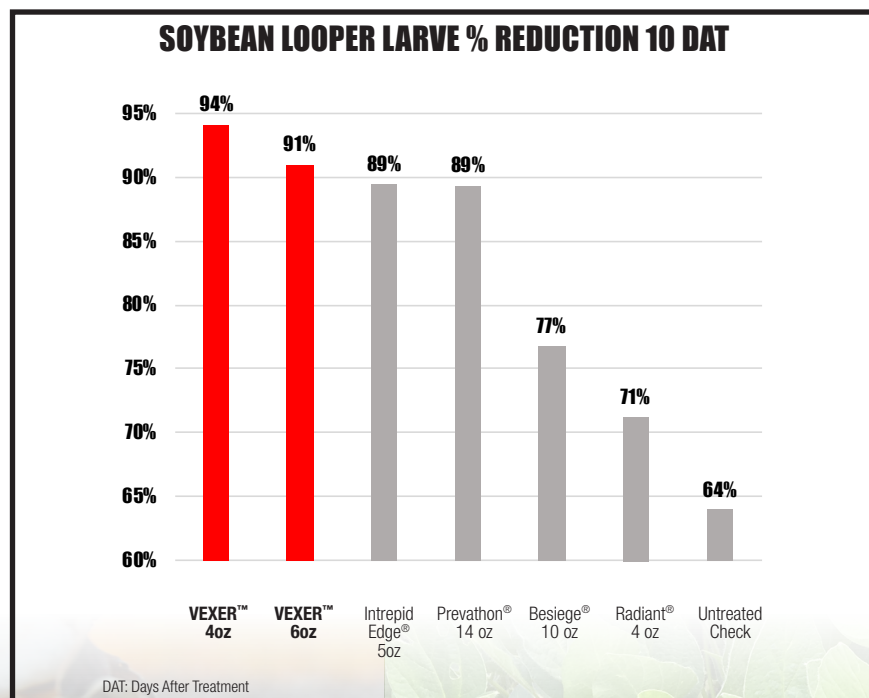

- Armyworms
- Beet Armyworm
- Corn Earworm(S)
- Cotton Bollworm(S)
- Cotton Leafworm
- Green Cloverworm
- Saltmarsh Caterpillar
- Southwestern Corn Borer
- Soybean Loopers
- Velvet Bean Caterpillar
- Western Bean Cutworm

¹ Restricted Use Pesticide (S)- Suppression

CROPS/ RATES

- Corn: 4 – 16 oz/A
- Cotton: 4 – 10 oz/A
- Soybeans: 4 – 8 oz/A
- Tree Nuts: 8 – 24 oz/A

*For a full list of crops and rates please refer to the label

Vexer insecticide provides control of a broad spectrum of lepidopteran insect species and can compete with industry standards like Prevathon and Intrepid Edge. When Vexer is mixed with select Invictis Crop Care's insecticides, efficacy and spectrum can improve control of key worm species and control a number of additional insects. Please refer to the performance chart below to determine the right mix for your insect spectrum.
