

VERIMAX[®] AMS

WATER CONDITIONING AGENT / DEPOSITION AGENT

A multi-functional water conditioner and deposition agent for post-emergent herbicide, defoliant, and desiccant sprays.

BENEFITS

- Designed to increase pesticide activity and improve absorption of the herbicide into leaf surfaces
- Contains special buffering additives to help maintain pH in a slightly acidic range, and sequestering and chelating agents to neutralize harmful metal cations and improve the characteristics of hard water
- Compatible with most pesticides and fertilizers

ACTIVE INGREDIENTS

Ammonium sulfate, glycerol acid complex, Acrylamide Sodium Acrylate Linear Copolymer and Siloxane	36%
---	-----

DIRECTIONS FOR USE

Verimax AMS is intended for use with products registered for agricultural, horticultural, turf, ornamental, industrial, aquatic non-crop uses. **NOT FOR AQUATIC USE IN WASHINGTON STATE.**

GROUND: 1-3 quarts per 100 gallons of water or spray solution (0.25% - 0.75% v/v concentration). If the total spray per acre is less than 20 gallons, use a minimum of 1 pint of Verimax AMS per acre.

AIR: 1-3 quarts per 100 gallons of water or spray solution (0.25% - 0.75% v/v concentration). **DO NOT** substitute Verimax AMS for water required by the label.

Verimax AMS used at the suggested rates will deliver water conditioning activity equivalent to 3 to 8.5 lbs. of ammonium sulfate per 100 gallons of water.

Always refer to the product label for Precautionary Language, Directions For Use and Specific Use Rates | Please reach out to your local Innervictis rep with additional product questions
