

FOLO SPRAY™

In season foliar applied fertility is a must in order to fill gaps in soil applied fertility programs. The Folo Spray™ family of products come in a variety of nutrient analysis to meet your specific need. Folo Spray products are water soluble foliar macro and micronutrients that can be applied by air, ground or through irrigation systems. Folo Spray products are manufactured to strict standards, so they dissolve thoroughly in water. Folo Spray products can be used on most row crops and specialty crops.

CROP/RATES

Refer to the appropriate Folo label for the desired rate by crop.

APPLICATION TIMING

Refer to the appropriate Folo label for correct application timings.
