

Pre-emerge herbicide for control of annual grass and broadleaf weeds in field corn, seed corn, sweet corn, yellow popcorn and grain sorghum.

BENEFITS

- Long lasting residual control of broadleaf weeds and grasses
- Application flexibility from two weeks pre-plant up to 12-inch corn
- Group 15, 27, and 5 actives help fight herbicide resistance issues

KEY WEEDS

- Palmer amaranth
- Florida beggarweed
- Carpetweed
- Common chickweed
- Henbit
- Horseweed (marestail)
- Kochia
- Common lambsquarters
- Shepherd's purse

RECOMMENDED ADJUVANT

Venturi® **0.5% - 1.0% v/v**

ACTIVE INGREDIENTS

Metolachlor **19%**
Atrazine **18.6%**
Mesotrione **2.44%**

CROP/RATES FOR WEED CONTROL

CROP	USE RATE
Field corn	3-3.5 qts/A
Grain sorghum	3 qts/A
