

Savant® herbicide provides post emergence and residual activity of tough to control broadleaf weeds like Canada thistle. Many herbicides provide control of thistle populations, but Savant is a long term solution to this weed species and can significantly reduce populations into the next growing season. Savant is labeled across key crops and is compatible with most other herbicides making it an excellent tank mix partner.

BENEFITS

- Controls most thistle weed species including: Canada, bull, & musk thistle
- Long term solution to reduce thistle populations
- Excellent tank-mix partner
- Flexible to use across many crops

KEY WEEDS

- | | |
|--|--|
| • Alfalfa, Volunteer | • Knapweed; Diffuse, Russian, Spotted |
| • Bean, Volunteer | |
| • Buckwheat, Wild | • Lettuce, Prickly/China |
| • Buffalobur | |
| • Clover; Black medic, Hop, Red, White | • Nightshade; Cutleaf, Eastern, Black, Hairy |
| • Cocklebur | • Ragweed; Common, Giant |
| • Dandelion | • Soybean, Volunteer |
| • Dock, Curly | • Sunflower; Common |
| • Horseweed/Marestail | • Thistle; Bull, Canada, Musk |
| • Jimsonweed | |

RECOMMENDED ADJUVANT

Traverse® **1-4 qt/100 gal**

ACTIVE INGREDIENT

Clopyralid **40.9%**

CROP/RATES FOR WEED CONTROL

| | |
|--|-------------------------|
| Field Corn, Sweet Corn | 0.25 – 0.66 pt/A |
| Wheat, Barley, Oats | 0.25 – 0.33 pt/A |
| Sugar Beet | 0.25 – 0.66 pt/A |
| Non-Cropland, Conservation Reserve Program | 0.33 – 1.33 pt/A |
