

INSECTICIDE

RESTRICTED USE PESTICIDE

In-can mixture of Nirvana® technology and bifenthrin. This "ready-to-use" formulation is an excellent option to mix with starter fertilizers.

## BENEFITS

- Controls seed and seedling pests such as armyworms, cutworms, grubs, seed corn maggot, and wireworms
- Maximum use rate controls corn rootworm
- Excellent tank mix partner with liquid fertilizers
- Stays in suspension longer than equivalent products allowing for more uniform application

## KEY INSECTS

### CONTROLLED

- |                    |                                  |
|--------------------|----------------------------------|
| • Army cutworm     | • Wireworm                       |
| • Cutworm species  | • Cucumber beetles               |
| • Cabbage maggots  | • Stalkborer                     |
| • Seed corn maggot | • Grape colaspis                 |
| • Root aphids      | • Corn rootworm larvae           |
| • Root maggot      | See label for additional insects |

## RECOMMENDED ADJUVANT

Verifact® **0.25% - 0.5% v/v**

## ACTIVE INGREDIENT

Bifenthrin **17.15%**

## CROP/RATES

<b>Artichoke</b>	8.5 oz/A
<b>Canola</b>	6.83 oz/A
<b>Corn</b>	2.8 – 17 oz/A
<b>Cotton</b>	1.7 – 8.5 oz/A
<b>Cucurbits</b>	3.4 – 8.5 oz/A
<b>Grapes</b>	4.3 – 8.5 oz/A
<b>Hops</b>	4.3 – 8.5 oz/A
<b>Soybeans</b>	2.8 – 8.5 oz/A
