

STAVE[®]PRO

Stave Pro is a pre-mix of two active ingredients, fluroxypyr and clopyralid, that provides postemerge control of more than 55 broadleaf weeds and suppression of an additional 15 weeds. These two active ingredients have proven themselves as industry leaders when it comes to managing hard to control weeds including: Canada thistle, kochia, wild buckwheat, and many more. Stave Pro is also highly active on broadleaf weeds that are ALS – resistant and dicamba-tolerant.

BENEFITS

- Convenient pre-mix of two proven active ingredients
- Provides control of tough to control weeds – Canada thistle, kochia wild buckwheat
- Controls resistant ALS and dicamba tolerant broadleaf weeds
- Flexible to use across many crops

CROP/RATES

CROP	USE RATE
Field Corn, Sweet Corn	1.33 pt./A
